

Dear Wheatbelt Member:

Planting season will soon be here and we are proud to offer SLIP Plate® Seed SLIK in our new packaging. This durable and reusable container is sealed to keep the product dry and ready to use. Seed SLIK products are seed flow lubricants made from high quality materials to allow seeds to flow easily off the planter plates of seed planters. It prevents seed bridging in the hopper and increases yields without damaging the seeds.

**Seed SLIK Graphite** is the most lubricious dry lubricant, allowing seeds to flow effortlessly through the planter. **Seed SLIK Talc** is a great alternative to graphite with new electronic seed meters that may give a false reading with graphite. **Seed SLIK SG Blend** is a mixture of graphite and talc to provide the benefit of improved lubricity with graphite and reduce particle agglomeration of using talc alone.

Order now and **save up to 20%** on all Seed SLIK and SLIP Plate products. **FREE FREIGHT** on orders of \$1,500 or more!

**Don't forget to stop by the Wheatbelt Feb 2013 Show to meet Ben Campbell from Rural America Sales, and receive a FREE sample of Tube-O-Lube! Booth #10**
